

Additional Requested Information regarding FY08 New Look Innovation Award-DISCOVER program

Partner's Information

We will be partnering with two Resource Management teachers and one STEP teacher from Fairfield Community High School, one ACT Prep/Careers teacher at Cisne High School and one STEP teacher from Edwards County High School.

Dissemination

The plan for dissemination of the DISCOVER inventory activity includes a portfolio provided to the partnering agency students and campus tour with instructor and/or student presentations. The presentation requirement will be met when the students come to FCC to receive their DISCOVER inventory results. The students will be taken on a campus tour where they will visit each Career and Technical department. An instructor and/or current FCC students from each department will then give a short presentation on what their department has to offer to incoming students. Each student's portfolio will include a flyer with an explanation of DISCOVER and what services this program has to offer, an agenda of the days scheduled activities, and FCC program specific informative reading materials. The Stevens Amendment will be included on the DISCOVER flyer.
